👤 Professional Summary

AI/ML Engineer and Data Analyst experienced in building predictive models, data pipelines, and intelligent automation systems. Having recently completed her Bachelor of Engineering in Computer Science with an 8.0 CGPA, she approaches complex technical challenges with both innovation and empathy. She is recognized nationally as a Fellow for the elite Samsung Fellowship and as a National Finalist for the Gandhi Fellowship, proving her dedication to systemic, high-impact change.

🧰 Professional Experience

Data Analytics Job Simulation, Deloitte Australia (via Forage) 07/2025 – 07/2025 | Remote

- Analyzed forensic datasets to classify complex information, derive actionable business insights, and improve stakeholder transparency.
- Developed interactive Tableau dashboards to visualize complex, large-scale data.

Machine Learning Intern, Zidio Development 07/2024 – 10/2024
Bengaluru, Karnataka

- Implemented real-time data processing for a Speech Emotion Recognition system utilizing Mel-Frequency Cepstral Coefficients (MFCCs) and pitch analysis.
- Developed a Digit Recognition engine using HOG and Zernike moments, translating complex mathematical models into functional software interfaces.
- Architected a scalable Recommendation System integrated with enhanced security protocols for user data protection.

Data Science Intern, Cognifyz Technologies 03/2024 – 04/2024 | Lucknow, UP

- AICTE Approved
- Engineered data balancing, validation, and sanitization pipelines to address extreme class distribution imbalances, drastically improving software and model reliability.
- Conducted advanced Restaurant Analysis & Modeling using geospatial tools and correlation metrics to pinpoint regional market trends.

AI Software Engineer, REXai 11/2023 – 03/2024 | Remote

- Optimized machine learning model scalability, training pipelines, and technical implementation for AI-driven enterprise solutions.
- Collaborated on backend engineering logic to ensure seamless, zero-loss data flow between heavy ML models and user interfaces.

🎓 Education

Bachelor of Engineering in Computer Science & Engineering (Specialization in Artificial Intelligence) 2022 – 2026 | Lucknow, UP

Babu Banarasi Das University

- Timeline: 2022 – 2026 (Completed, Results Awaited)
- Cumulative GPA: 8.0 / 10

- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Generative AI, Data Structures & Algorithms (DSA), Operating Systems, System Design.

Technical Skills

AI, ML & Data Science

Large Language Models (LLMs), AI Agents, Neural Networks, Computer Vision, Multi-Agent systems, and deep learning metrics.

Programming & Frameworks

Python, SQL, JavaScript, Django, C, HTML5, CSS3, React

Data Science Tools

Tableau, Power BI, Excel, Statsmodels, Pandas, NumPy, and resolving data distribution class imbalances.

IoT & Cloud Platforms

Google Cloud, GitHub, VS Code, edge integrations, and microcontroller hardware telemetry arrays.

Certifications

- AI Agents Intensive Course – Google & Kaggle
- AI For India 2.0 – GUVI (An IIT Madras incubated company)
- Natural Language Processing, AI & Deep Learning – Infosys Springboard
- Space Science & Technology / RS & GIS Applications – Indian Space Research Organization (ISRO IIRS)
- Exploratory Data Analytics & Python for Data Science – IBM / Infosys Springboard

FELLOWSHIPS & COMPETITIVE SELECTIONS

Fellow, Samsung Fellowship – ISWDP (Cohort 8)

2026

National Finalist, Gandhi Fellowship

2026

Selected as a finalist for the prestigious intensive leadership program focused on driving systemic public and social changes.

LEADERSHIP & RECOGNITION

Founder & Ex-Chairperson | IEEE Student Branch, BBDU

11/2024 – 04/2026 | Lucknow, India

- Established the campus chapter from the ground up, scaling to over 70+ active members.
- Served as Head Event Coordinator for IDEATHON 2025 (Akhil Jyot), managing technical coordination for 70+ participating teams.

Nominated, IEEE SPS UP Chapter Student Award 2024

Nominated for exemplary technical leadership and driving the sustainable growth of the Signal Processing Society student branch.

KEY TECHNICAL PROJECTS

Smart Bin: AI & Edge IoT Hardware Platform

- Publication: International Conference on AI in Digital Growth (ADG 2025), IEEE Computational Intelligence Society.
- Authored custom AI logic to parse raw hardware sensor packets and microcontroller hardware telemetry arrays directly into structural database tables.
- Designed an automated waste segregation system utilizing Arduino, humidity sensors, ultrasonic sensors, and servo motors to instantly separate wet and dry waste.
