👤 Professional Summary

Software Engineer with experience in backend development, scalable data systems, and API integration using Python, Django, and SQL. Having recently completed her Bachelor of Engineering in Computer Science with an 8.0 CGPA, she approaches complex technical challenges with both innovation and empathy. She is recognized nationally as a Fellow for the elite Samsung Fellowship and as a National Finalist for the Gandhi Fellowship, proving her dedication to systemic, high-impact change.

🧰 Professional Experience

Artificial Intelligence and Machine Learning Intern, Zidio Development

07/2024 – 10/2024
Bengaluru, Karnataka

- Architected a scalable Recommendation System backend, implementing encryption protocols, cryptographic hashing, and row-level access tokens ensuring comprehensive user data security.
- Designed and built robust MVC backend application layers using Django to translate algorithmic data calculations (HOG and Zernike moments) into clean, production-ready REST API endpoints.
- Engineered multi-threaded data pipelines handling real-time signal extraction (MFCC arrays) for a Speech Emotion Recognition interface, significantly lowering runtime processing buffer latency.

Data Science Intern, CipherByte Technologies

03/2024 – 04/2024 | Remote

- Built an NLP-based asynchronous data classification platform for email sorting streams, implementing clean backend error-handling routines, regular expressions, and database persistence layers.
- Integrated statistical time-series forecasting frameworks (Statsmodels) into responsive web-based Django dashboards, pushing real-time analytics updates via structured JSON feeds.

Backend Systems Intern, Cognifyz Technologies

03/2024 – 04/2024 | Lucknow, UP

- Engineered data balancing, validation, and sanitization pipelines to eliminate ingestion bias; designed database schema rules to resolve extreme class distribution imbalances, improving platform software reliability.

AI Software Engineer, REXai

11/2023 – 03/2024 | Remote

- Optimized system backend logic and application scalability for high-concurrency enterprise solutions, executing performance profiling to achieve lower API routing latency.
- Collaborated on core relational database schemas and data orchestration matrices to ensure zero-loss, reliable pipelines between heavy data processing engines and front-end application states.

🎓 Education

Bachelor of Engineering in CSE (Spec. in AI), Babu Banarasi Das University

2022 – 2026 | Lucknow, UP

- Status: Final Semester Curriculum and University Examinations Concluded (Official Results Awaited). | Cumulative CGPA: 8.0 / 10
- Core Foundations: Advanced DSA, System Design, Software Engineering, Operating Systems, Web Infrastructure.

Technical Skills

Programming & Databases

Python, SQL, JavaScript, C, HTML5, CSS3

Frameworks & Core Tools

Django, React, NumPy, Pandas, Statsmodels, GitHub

Core Computer Science

Data Structures & Algorithms (DSA), Operating Systems, System Design, OOPs

CORE CERTIFICATIONS

- Google & Kaggle: 5-Day AI Agents Intensive System Course Verified
- ISRO (IIRS): Space Science & Technology / RS & GIS Applications Certified
- HCL GUVI & Digital India: Mission Upskill India: AI Impact Summit Track
- IBM & Infosys Springboard: SQL & Relational Databases 101, Advanced AI Projects with Python, NLP

FELLOWSHIPS & COMPETITIVE SELECTIONS

Fellow, Samsung Fellowship – ISWDP (Cohort 8)

Selected for the prestigious national technical fellowship track focused on advanced technology development.

National Finalist, Gandhi Fellowship

Selected as a national finalist for high-impact social-systemic innovation and agile public operations.

KEY TECHNICAL PROJECTS

Smart Bin: Distributed Full-Stack IoT Platform, Active IEEE Publication

- Engineered a fully responsive Django web platform built to aggregate real-time hardware telemetry streams, manage user session authentications, and display analytical parameters on a live map dashboard (ADG 2025, IEEE Computational Intelligence Society).
- Authored custom backend middleware to parse raw hardware sensor packets (ultrasonic/humidity arrays) received from an Arduino microcontroller directly into structural database tables.

LEADERSHIP & RECOGNITION

Founder & Ex-Chairperson | IEEE Student Branch, BBDU

11/2024 – 04/2026 | Lucknow, India

Established the chapter from absolute inception, scaling active membership to 70+ engineering students and setting up collaborative project sprint frameworks and coordinating IDEATHON 2025.

Recipient | IEEE SPS UP Chapter Student Award

Awarded top honors for exemplary technical leadership, community building, and scaling cross-functional project deployments within the Signal Processing Society branch.
